Mujjamil Kurundwad

Aspiring AI Engineer | Python | Generative AI | RAG | LLMs

Kolhapur, Maharashtra | +91 9307984330 | mujammilkurundwad@gmail.com | LinkedIn | GitHub | LeetCode

Professional Summary

B.Tech graduate and aspiring AI Engineer with hands-on experience building AI-powered applications using Python, Generative AI, RAG, and LLMs. Experienced in integrating Google Gemini APIs, developing RAG pipelines, working with embeddings and vector search, and building AI applications with Flask and Streamlit. Strong foundation in Object-Oriented Programming, backend development, RESTful APIs, and databases, with a focus on building practical and scalable AI solutions.

Technical Skills

Programming Languages: Python, Java, SQL

AI & Generative AI: Generative AI, LLMs, RAG, Embeddings, Vector Search, Google Gemini API, OpenAPI

Backend & Frameworks: Flask, FastAPI, Streamlit, LangChain, LangGraph, RESTful APIs

Databases: MySQL, MongoDB, Supabase

Developer Tools & DevOps: Git, GitHub, Postman, IntelliJ IDEA, Eclipse, Cloudinary, Docker

Core Concepts: Data Structures & Algorithms (DSA), OOP, RAG Architecture, LLM Application Development

Professional Experience

Trainee — Paarsh Infotech Pvt. Ltd. **Dec 2025 – Jun 2026**

Pune, India

- Developed and integrated AI-powered application components using Python, Flask, Google Gemini API, and RESTful APIs, focusing on practical Generative AI and LLM-based solutions.
- Built and experimented with RAG (Retrieval-Augmented Generation) pipelines, working with embeddings, vector search, and contextual information retrieval for improved AI responses.
- Integrated Google Gemini LLM APIs to develop intelligent features including conversational question answering and email summarization.
- Collaborated with cross-functional teams to debug, test, and optimize application workflows, resolving 30+ functional issues and improving overall application reliability.

Key Projects

SnapClass – AI-Powered Attendance Management System GitHub

Tech Stack: Python, Streamlit, face_recognition (dlib), Librosa, Resemblyzer, scikit-learn, Supabase, bcrypt, Segno, Pandas, NumPy

- Built a Streamlit attendance platform integrating 10+ Python libraries, with 2 role-based portals (teacher and student) and session-based screen routing.
- Implemented 2 AI verification methods, face recognition (dlib) and voice embeddings (Resemblyzer), to automate attendance marking.
- Integrated a Supabase database and secured user accounts with bcrypt password hashing.
- Added QR code and join-code based class enrollment (Segno) so students can auto-enroll via a shared link.

AI Personal Assistant GitHub

Tech Stack: Python, Flask, Google Gemini API, Google GenAI SDK, RAG, LLMs, Embeddings, Vector Search, HTML, CSS

- Built a Flask and Gemini API assistant that answers natural-language queries with contextual responses.
- Implemented RAG with embeddings and vector search to retrieve relevant context and improve LLM response quality.
- Added Gemini-based email summarization that generates concise summaries from user-provided email content.
- Built RESTful backend endpoints and secured Gemini API credentials using environment variables.

Education

Bachelor of Technology (B.Tech) in Electronics and Computer Engineering **2022 – 2026**

Sharad Institute of Technology, College of Engineering, Yadrav CGPA: 6.97

Certifications & Achievements

- **Data Structures & Algorithms** — Completed over 150 algorithmic challenges on LeetCode using Java, improving problem-solving efficiency by 71% and demonstrating advanced proficiency in algorithm optimization.
- **Advanced Computer Networks** — NPTEL (IIT)
